

# YOUR DATA ANYWHERE, ANYPLACE, ANYTIME

We will work closely with your organization to ensure that your data and workflows are customized to your needs and are also ready for long-term preservation, regardless of what new software lurks around the corner. We are committed to immediate utility, long-term sustainability, cost-effectiveness, and infinitely flexible customization.

*Given our philosophy of **One-Size Fits One**, we do not provide a standard price for most of our services. Please fill out our "request a quote" link on our website (<http://discoverygarden.ca>) or send us an email ([info@discoverygarden.ca](mailto:info@discoverygarden.ca)). We will respond within 48 hours.*

## DEVELOPMENT, SUPPORT, PRODUCTION & HOSTING SERVICES

### DEVELOPMENT

#### INSTALLATION

Gets you up-and-running with your own local instance of Islandora, including: prepping the server, installing the Islandora framework, and ensuring all components are functioning.

#### IMPLEMENTATION

Designed to create a full-featured Islandora framework on your own local or a remote hosted server, with the full suite of functionality needed to ingest and serve all your key digital assets.

#### DESIGN & BRANDING

We create a professional and compelling look for your site, including graphic design (including logos and promotional material), interface theming and CSS work.

#### DEVELOPMENT

Provides the focus you need to create the functions that best serve your local needs. Our development services can be used to create unique Content Models that leverage your assets and back-end workflows to the maximum benefit of your organization.

#### CONSULTING

Our knowledgeable staff are among the best and brightest in the repository community. With a team created to suit your specific requirements we can provide the full range of expertise needed to design, build, deploy and sell your repository solution.

### SUPPORT

#### ANNUAL SUPPORT

Designed to give you confident security with a long-term support agreement.

#### PER-INCIDENT SUPPORT PACK

A cost-effective package of per-incident support tickets.

#### PER-INCIDENT SUPPORT

Per-incident support at a reasonable hourly rate.

#### ANNUAL SUPPORT & MAINTENANCE

By combining an annual support contract with maintenance, you get all of the benefits of annual support as well as the latest patches and updates to the applications in the Islandora software stack.

#### PER-INCIDENT MAINTENANCE

Per-incident maintenance at a reasonable hourly rate.

### PRODUCTION

#### DIGITIZATION

Using the most advanced scanning and digitization equipment to convert your print and analogue collections to appropriate formats and metadata for direct ingest into Islandora.

#### DATA TRANSFORMATION

Converting your existing digital assets to ensure long-term stewardship and preservation using the most cost-effective processes.

### HOSTING & CLOUD

#### HOSTING:

A cost-effective alternative to maintaining a local hardware and IT infrastructure, in a highly secure framework.

#### CLOUD:

Providing just the right services with the improved safety and security of clouds, when you need them, and without implementing costly local hardware and software systems.
